

Maths

We will use number facts to add and subtract mentally. We will continue to use the grid method to multiply by 2, 3, 4, 5 and 8 and understand the inverse. We will also learn to divide using the chunking method when there are no remainders. We will draw & interpret bar charts & pictograms. Finally, in measurement we will study weight & measure in multiples of 100g.

Geography

Our geography topic on Settlement and the local area will continue and we will also look at the Coastline, why it is important and the impact of humans on it. This will include a fieldtrip to the beach to study erosion and habitat.

In P.E. we will look at cricket with an emphasis on throwing

bowling and catching.

Design Technology

P.E.

We will continue to study the concept of

design of bridges in the local area.

French. They will consolidate their vocabulary knowledge and develop their ability to write in French.

an emphasis on mastering the art of the apostrophe for possession.

In grammar, identification of different word groups will continue and we will also study how to enhance our work by using different sentence openers and rearranging the words.

Science

In the first half of the summer term our topic will be plants.

ICT

We will revisit the topic of programming and continue to learn how to debug a program. We will also learn how to use a search engine to find specific information on the internet.

French

The children will continue learning

Design Technology

We will study the concept of design through the ages, exploring the importance generating ideas and producing clear plans for Roman artefacts.
