

## Lego Club

Lego Club is a new venture which we are currently running during two lunchtimes. The children work in groups of three to build a model following the instructions.

One child is the engineer, one the supplier and the third the builder. Each person has a specific role in the activity.

The engineer describes the pieces needed for the supplier to find. The supplier then hands to the build who needs to follow instructions from the engineer. After three or four instructions the children switch roles until the model is complete.

## Finished models
